TITLE : OPTICAL FIBER SHEET AND
LAMINATE THEREOF

ABSTRACT : PURPOSE: To provide the optical fiber sheet laminate in which optical fibers can stably attain a square stack arrangement structure and to form the end face of the optical fiber sheet laminate to a nearly exact square shape.

CONSTITUTION: Optical fiber laminate stabilizing members 12 are disposed at proper intervals in the spacings between the optical fibers 10 of the optical fiber sheet 11. Since the end face of the optical fiber sheet laminate is nearly exactly square in such a case, the coupling efficiency to a liquid crystal panel is improved.
